1.Description

ECC system is scheduled for an upgrade on May 25, in accordance with this there will be a planned outage in ECC,which will be effecting the inbound and outbound transactions flowing through this system. During this outage all the transactions will be on hold.

2.Implementation Plan

Step 1 :

All the concerned parties will be notified..

Step 2 :

Upgrade starts atMay 25 2 am

Step 3 :

EAI job will be triggered to hold the transaction in EAI

Step 4 :

Process Administrator will kick off the upgrade.

Step 5 :

Process Administrator will kick off the upgrade.

Step 6 :

ECC upgrade ends.

Step 7 :

EAI job will be triggered to release the transactions.

Step 8 :

All the parties will be notified back.

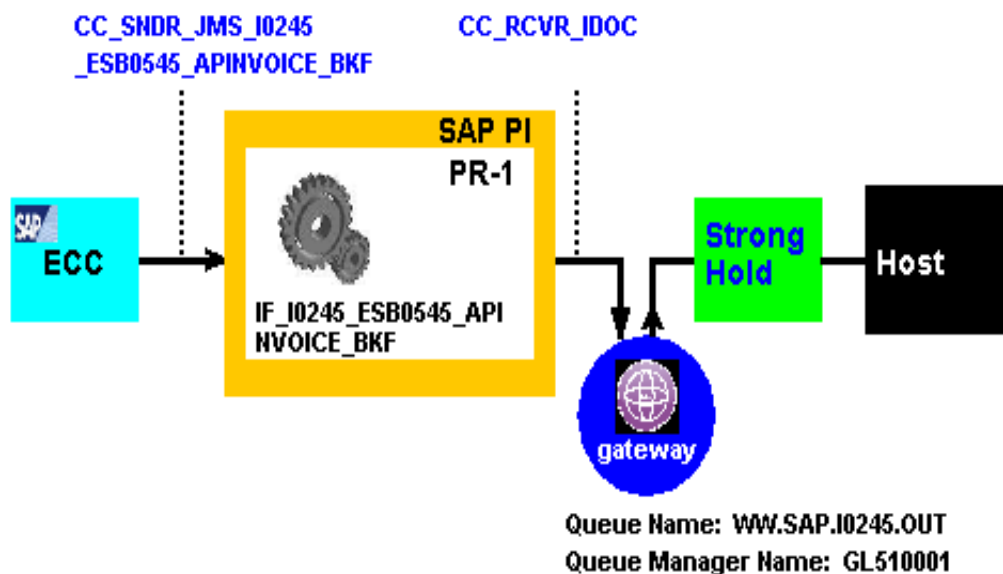

3.System Capabilities

Application Type	Outagee Handling Capability
ECC	NO
Host	NO
EAI	YES
PI	NO

4.Areas Effected

1.1 Interface Name : I0245

1.1.1 WorkFlow

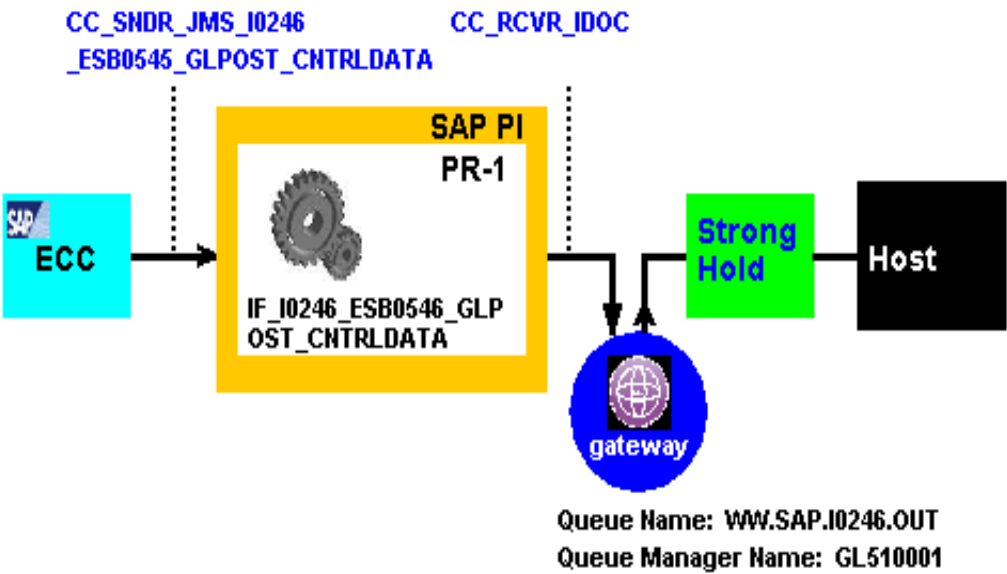

1.1.2 Configuration Details

Object Type	Object Details
Sender Channel	CC_SNDR_JMS_I0245_ESB0545_APIINVOICE_BKF
Reciver Channel	CC_RCVR_IDOC
Queue Name	WW.SAP.I0245.OUT
Queue Manager Name	GL510001
Iflow Name	IF_I0245_ESB0545_APIINVOICE_BKF
PI Server Name	PR2

2.1 Interface Name : I0246

2.1.1 WorkFlow

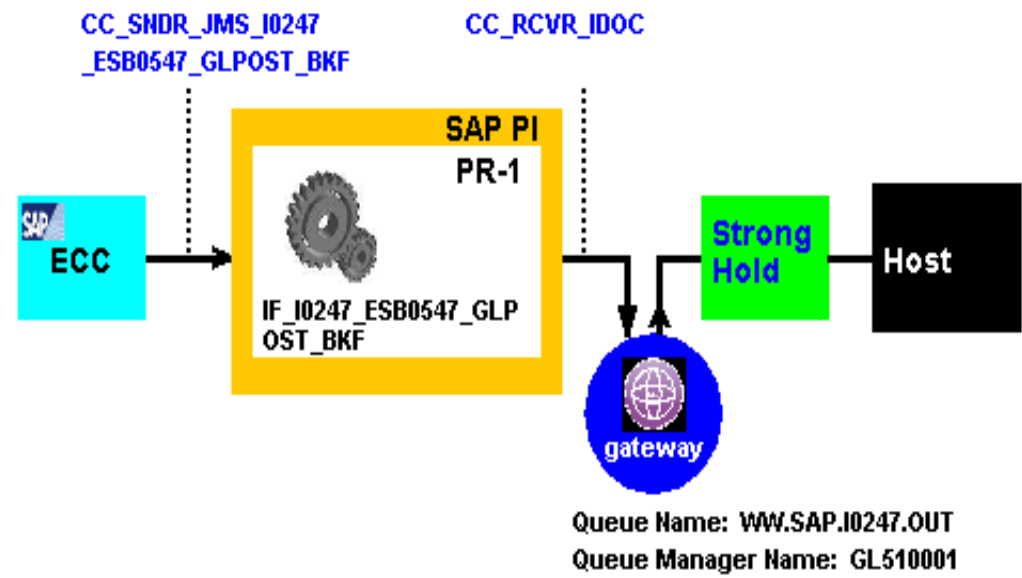

2.1.2 Configuration Details

Object Type	Object Details
Sender Channel	CC_SNDR_JMS_I0246_ESB0545_GLPOST_CNTRLDATA
Reciver Channel	CC_RCVR_IDOC
Queue Name	WW.SAP.I0246.OUT
Queue Manager Name	GL510001
Iflow Name	IF_I0246_ESB0546_GLPOST_CNTRLDATA
PI Server Name	PR3

3.1 Interface Name : I0247

3.1.1 WorkFlow

3.1.2 Configuration Details

Object Type	Object Details
Sender Channel	CC_SNDR_JMS_I0247_ESB0547_GLPOST_BKF
Reciver Channel	CC_RCVR_IDOC
Queue Name	WW.SAP.I0247.OUT
Queue Manager Name	GL510001
Iflow Name	IF_I0247_ESB0547_GLPOST_BKF
PI Server Name	PR3
